

Stick

Automatic Labelling Machine

Versatile standalone machine designed for applying adhesive labels to various types of containers

Stick is an automatic machine equipped with :

- The single label dispenser can be integrated to an already existing packaging line thanks to its holder adjustable in height and width by a crank.
- An adjustable head to apply labels on top of o product.
- The label dispensers are outfitted with asynchronous motors regulated by frequency converters.
- Product detection by optical sensor.
- Variable speed from 8 to 16m/minute or from 16 to 32m/minute.
- Power supply : 220 V 50 Hz.

Technical focus n°1

ROLLING DIRECTION : *OUTSIDE LEFT*

The machine is designed for label rolls with a left-hand outer winding direction. In addition, the dimensions of the rolls must be as follows:

- a : chuck diameter = 76 mm
- b : max. coil diameter = 260 mm
- c : max. labelling height = 160 mm
- d : label gap = 3-5 mm

Important : Label reels should be stored in a dry place between 15°C and 18°C.
